

PRODUCT END OF LIFE NOTICE

PXM0057-xxx

1 Azoteq Product End-of-Life Policy

Azoteq appreciates that our customers often have long product life cycles. As Azoteq values our customers' needs, we try to keep older products in production for as long as possible. There is however situation when product obsolescence cannot be avoided.

When Azoteq determines to make a product obsolete or End of Life (EOL) the only formal notification to be provided will be this End Of Life Notice, indicating the affected products and time periods that may be applicable.

The notice will be distributed to selected customers, official distributors, representatives and will be made available on the Azoteq website (www.azoteq.com).

Azoteq aims to make available and identify replacement or alternative products in the EOL notifications when at all possible.

When an EOL notice has been given the typical time period for customers to place final orders is six months from the date of customer EOL notification*. Unfortunately, due to circumstance beyond our control, following the global capacity and supply constraints, we have no alternative but to enforce this EOL with immediate effect.

We have exhausted all and any possibilities to find an alternative manufacturing source for the PXM0057-xxx but without success. We do not anticipate receiving any allocations from our foundries within the short to medium term.

The time periods indicated by the EOL Product List below must be considered as the dates applicable to each individual product. This may vary from the above due to circumstances surrounding a specific product.
